

Dimensions for Capacity Building in Disaster Risk Management

Prevention without receivers who are informed and understand is *useless*

-> **Awareness Building**

Informed people without knowledge what to do are *helpless*

-> **Knowledge transfer**

Knowing what to do without the possibility and the infrastructure to use the knowledge is *desperate*

-> **Development and Zoning**

The technical and informational infrastructure without key persons to plan, implement, use and to guide is *ineffective*

-> **Skills Training**

Key persons and institutions without a clear mandate and support from the society and politicians are *isolated*

-> **Dialogue and Participation**

Awareness, knowledge and skills that are not passed to more people and the next generations are *not sustainable*

-> **Network of Training Institutions**
